

Tools Required:

- 4mm hex key
- 8mm hex key
- Special tool (provided)

Protection Class: IP65

Weight: 127.9 lbs.

Dimensions

- A:** 8-5/8" x 8-5/8"
- B:** 128"
- C:** 177"

Notice to Installer for 84 065:

- See page 2 for specific product safety warnings.
- 79 801 anchorage kit must be installed in concrete foundation.
- Anchorage kit 79 801 is buried below finished grade. Attention to alignment, leveling, and location is required for proper installation.
- LED module and LED driver provided, integral in luminaire.

79 801 anchorage installation:

- Provide means to bring supply wiring to linear element in accordance with local code. The template has a 3-15/16" conduit hole for conduit entry. Provide adequate foundation reinforcement for the intended load (by others).
- Use template and anchor bolts provided to assemble anchorage kit to be set. Make sure anchor bolts do not protrude from lower concrete foundation more than 3" as shown.
- Please refer to figure to establish location of lower concrete foundation. The anchorage kit **MUST BE** buried. The top of the lower concrete foundation **MUST** be 6-7/8" **BELOW** finished grade for proper installation. Position anchorage and level template properly.
- Align and level anchorage kit so the corners of the square template are aligned with the desired location and orientation of the corners of the square linear element. See figure.
- Install anchorage kit using either method:
 - Attach template to forming and level properly.
 - Insert anchorage kit into poured concrete. Concrete must be vibrated to ensure proper anchorage setting. Level template properly.

84 065 installation:

- Once the anchorage is set, remove template and hardware.
- Pull supply wiring to a length where splices can be seen and made through the access door.
- Route supply wiring through the mounting base and install mounting base using hardware provided. Complete finished grade. See figure.
- Use special tool provided to unlock the access door lock and remove access door. Route the luminaire wiring down and out the hand hold for connections to be made later.
- Loosen (8) M10 set screws at the base of the light element and place the light element over the mounting base. Tighten (8) M10 set screws to secure to base.
- Make supply wiring and luminaire wiring connections inside the luminaire:
 - MAIN VOLTAGE SUPPLY WIRE TO BLACK LUMINAIRE WIRE
 - NEUTRAL (COMMON) SUPPLY WIRE TO WHITE LUMINAIRE WIRE
 - GREEN GROUND WIRE TO GREEN LUMINAIRE WIRE
- Replace access door and lock.

Relamping/Maintenance

Loosen hex socket head screws near lens and remove top. Clean luminaire and lens using only solvent-free cleansers. Replace reflector and ballast assembly and replace top. Tighten screws evenly, making sure gasket is seated properly.

Lamp: 39.5W LED

Accessories

Please refer to the appropriate accessory installation sheet for further instruction when applicable.

Anchorage Kit - included 79 801

Replacement Parts

Description	Part No
Lens (consult factory)	11318710
Special tool - access door	560091
LED driver (120V-277V)	75985-03
LED module (4000K)	LED-0808/840
LED module (3000K)	LED-0808/830
