

Tools Required:

- 2.5mm hex head screwdriver
- 3mm hex head screwdriver

Overview:

LED Watts: 27.4W
 System Watts: 32.0W
 Controllability: 0-10V dimming down to 1%
 Weight: 14.1 lbs.
 Protection Class: IP68

Dimensions

A: 12-7/8"
 B: 15-1/2"
 C: 10"

Notice to Installer:

1. **BEGA luminaires may be damaged if connected to conduit systems containing water - Article 300-5G of National Electric Code requires that "Conduits or raceways through which moisture may contact energized live parts shall be sealed or plugged at either or both ends".**
2. A separate wiring box suitable for outdoor locations for power supply connections must be provided (by others).
3. Proper drainage **MUST** be provided. Failure to do so may result in condensation and void warranty.
4. For proper installation, housing and finished surface must be installed so that the top of the housing (bottom of faceplate) sits flush or slightly above the finished surface.
5. For vehicular loads, housing must be anchored to a suitable, load bearing foundation. In all other applications, load bearing foundation should be sufficient to support anticipated load onto fixture.
6. Do not use power tools to open and close fixture, use hand tools only. Failure to do so can result in incorrect sealing of fixture and void warranty.
7. Fixture does not need to be opened for installation.

Luminaire 84 155 Installation:

1. Establish location of wiring box, by others. Note that the luminaire is pre-wired with 7.5' of waterproof cable, factory sealed to the luminaire house. Ensure proper drainage is provided. A minimum of 6" of pea gravel is required under wiring box. More gravel may be required in areas that have poor soil drainage and/or are subjected to freeze. See Figure 1
 2. Establish foundation for installation housing. A level surface must be provided. Anchor installation housing in place using hardware (by others) as needed. Minimum 1/4" anchor bolts are recommended.
 3. For concrete installations, pour concrete around installation housing. Ensure that the finished surface is either flush or below the edge of installation housing. Wait for concrete to dry and cure before installing the rest of the luminaire.
 4. Make supply wiring and cable connections inside wiring box using Kit #40 waterproof connector kit (provided)
 - MAIN VOLTAGE SUPPLY WIRE TO BLACK LUMINAIRE WIRE
 - NEUTRAL (COMMON) SUPPLY WIRE TO WHITE LUMINAIRE WIRE
 - GREEN GROUND WIRE TO GREEN LUMINAIRE WIRE
- Dimming (if applicable):
- DIMMING CONTROL WIRE (+) TO POSITIVE DRIVER DIM CONTROL WIRE
 - DIMMING CONTROL WIRE (-) TO NEGATIVE DRIVER DIM CONTROL WIRE
5. Loosen (2) 2.5mm hex head screws on faceplate to access hardware for mounting clips. See figure 2. Caution: Do not open faceplate screws.
 6. Ensure clips are loosened for installation. Use a 3mm hex head screwdriver to loosen clips as needed.
 7. Insert luminaire into installation housing and tighten (2) 3mm hex head screws as needed until luminaire is secure in installation housing.
 8. Replace (2) 2.5mm hex head screws.

Accessories

Please refer to the appropriate accessory installation sheet for further instruction when applicable.

Maintenance:

Clean regularly with solvent-free cleaner removing dirt and debris. Do not use high pressure cleaners.

Replacement Parts

See label inside of fixture for LED replacement part number.

Consult factory for all other replacement components.

Product Safety Warnings:

THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODE BY A PERSON FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED. SUITABLE FOR WET LOCATIONS. SUITABLE FOR USE IN POURED CONCRETE CONSTRUCTION. MIN 60°C SUPPLY CONDUCTORS.

CE PRODUIT DOIT ÊTRE INSTALLÉ SELON LE CODE D'INSTALLATION PERTINENT, PAR UNE PERSONNE QUI CONNAÎT BIEN LE PRODUIT ET SON FONCTIONNEMENT AINSI QUE LES RISQUES INHÉRENTS. CONVIENT AUX EMPLACEMENTS MOUILLÉS. PEUT ÊTRE UTILISÉ DANS LE BÉTON COULÉ. LES FILS D'ALIMENTATION 60°C MIN.
