

Application

The FSIR-100 is a handheld configuration tool that provides the user to program any BEGA motion sensor to desired parameters. This tool enables adjustment of parameters including high and low light levels, motion sensitivity, time delay, and cut off time. The wireless tool stores up to five sensor parameter profiles to speed configuration of multiple sensors. The FSIR-100 features an easy to read LED screen and an intuitive navigation pad to access simple menus to ensure ease of use. The configuration tool addresses fixtures individually, allowing installations to be customizable and highly intelligent. Wireless communication with motion sensors is achieved through an infrared signal with a range of up to 32 feet. The FSIR-100 is sold separately from motion sensors.
